

## ICESat-2 Educator Workshop

Thursday, September 13, 2018

4:00pm-5:30pm

Dick DeWees Senior Center, Lompoc, CA

Learn all about the science of the ICESat-2 Mission launching September 15, 2018 to study the heights of ice and trees on Earth. There will also be a hands-on tree height-measuring activity and a HoloGLOBE virtual reality educational app demonstrated.

The workshop will also be broadcasted live via Facebook Live from the GLOBE Mission Earth Facebook page at <https://www.facebook.com/globemissionearth>

To attend in person, please RSVP Brian Campbell [Brian.A.Campbell@nasa.gov](mailto:Brian.A.Campbell@nasa.gov) with your name, school name, grade level, and number of attendees.

Following the educator workshop, there will be a hands-on ICESat-2 Mission exhibition that will be open to the public from 5:30pm-8:00pm
